FLAT MOON are about to unleash their second single on Monomyth Records. 'Filet-O-Freak' is a no holds barred funk romp through the ages. This band are developing so fast and producing the goods at every turn. On the live circuit they are something to behold, truly mesmerising and addictive, we defy you to stand still as this group of wonderful humans take to the stage. Sold out shows and massive public acclaim are well deserved and Monomyth Records are proud to be along for the journey!

'Filet-O-Freak' is undoubtedly our funkiest, filthiest release yet, and it's also our first track to feature Scarlet, our new saxophonist/6th member.

The track combines P-Funk style grooves with a generous dose of heavy psychedelia; the resulting sound is both chunky and funky. The lyrics promote the positives of embracing your individuality, and encourage the celebration of the bizarre or unfamiliar.

Infectious and ever-so-slightly unhinged, 'Filet-O-Freak' is a multi-dimensional funk juggernaut, slapping HARD from start to finish. If we do say so ourselves'.

'By blending genres that could be viewed as dated, Flat Moon actually give us a fresh take on some classic sounds. If you're new to the band, they may take you by surprise. But if you're tired of the same old - be sure to give this 'stormy psych-soul' outfit a whirl.
