Flat Moon are a Leeds based band who have recently signed to Monomyth Records. The guys have been making waves in around the northern music scene for the past couple of years. Their blend of complex funk with psychedelic undertones makes them stand out from the boring monotony of the run of the mill 5 piece lad band. Flat Moon will astonish you and leave you wanting more...much more!

To say that Demise is a powerhouse of a production is putting it mildly. The song takes the listener on a journey through a half forgotten dream taking place in a sleazy yet sophisticated night club situated somewhere in the background of the west side story stage set. In the blink of an eye you are transported into a realm of Bootsy Collins bass licks punctuated by the effortless backing vocals of Lily Kaye and then back into the relative calmness of the Sinatra esque intro section. Now these tropes may sound dated but this track is definitely modern both in style and execution. If this is the beginning of Flat Moon's journey with Monomyth Records then we can't wait to hear what's next.

'Demise' is our best tune to date, and is an excellent display of the genre fluidity we strive for in our music. The song starts with an air of mystique and melancholy, with pensive lyricism, before erupting into a segment of molten hot funk. Classic Flat Moon. From the bleak empty streets, to the front row at a gig, 'Demise' is not only a musical journey, but a near biblical experience.
